Alwyn Victor Tablatin

Senior Full-Stack AI Engineer | LLM Applications | TypeScript, React/Next.js, Node.js, Python

alwyn.tablatin@gmail.com | github.com/VictorAlwyn

PROFESSIONAL SUMMARY

Senior Full-Stack AI Engineer with 8+ years of experience building and shipping production web and mobile applications for companies in the United States, Canada and the United Kingdom. For the past two years, focused on AI-powered products: LLM workflows, AI agents, voice agents and serverless AI processing for healthcare and SaaS platforms. Strong across the stack with TypeScript, React/Next.js, React Native, Node.js, Python and AWS, with hands-on experience in real-time systems, SOC 2 security work, CI/CD and automated testing. Comfortable owning features end to end, from design to deployment, and working directly with clients, product managers and cross-functional remote teams.

TECHNICAL SKILLS

AI & LLM: LLM Integration, Generative AI, Prompt Engineering, AI Agents, Agentic Workflows, LangChain, LangGraph, Voice AI Agents (LiveKit), Human-in-the-Loop Review, Stable Diffusion, RunPod Serverless GPU

Languages: TypeScript, JavaScript, Python, PHP, SQL, HTML5, CSS/Sass

Frontend & Mobile: React.js, Next.js, React Native, Expo, Three.js, React Three Fiber, MobX, Responsive Design

Backend & APIs: Node.js, Express.js, NestJS, REST APIs, GraphQL (Apollo), Laravel, CodeIgniter, Event-Driven Architecture, Real-Time Systems, Queues and Background Jobs

Cloud & DevOps: AWS, Serverless (AWS SST), Cloudflare Workers, Fly.io, CI/CD, GitHub Actions

Databases: PostgreSQL, MySQL, DynamoDB

Security & Auth: OAuth 2.0, Single Sign-On (SSO), Passkeys (WebAuthn), Session Management, SOC 2 Compliance, Multi-Tenant Architecture

Testing & Quality: Playwright, Jest, React Testing Library, End-to-End Testing, Code Reviews

Other: Shopify, Contentful, Retool, Agora, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack AI Product Engineer

DocAssistant.ai | Remote (United States) | Aug 2025 – Present

- Build and ship features across the web app, React Native mobile app, backend API and serverless AI processing pipeline for a clinical documentation platform used by healthcare providers.
- Migrated the platform to a real-time, event-driven architecture across web and mobile, so AI-generated clinical content appears as soon as it is ready.
- Extended the LLM documentation pipeline with new content types and dependency-aware regeneration, so content is generated only when needed and updates automatically when source data changes, reducing unnecessary LLM calls.
- Built an LLM automation workflow that converts engineering changes into user-facing release notes, with configurable prompts and a human-in-the-loop review step.
- Delivered SOC 2 security work: abuse protection, hardened session management, single sign-on (SSO) and passwordless passkey (WebAuthn) authentication.
- Built multi-tenant collaboration features: organization management, secure content sharing, real-time messaging and shared templates.
- Built clinical decision-support tools using a reusable, extensible component architecture with automated test coverage.

- Built cross-platform product analytics and internal admin dashboards to support data-driven product decisions.
- Improved mobile reliability and App Store/Google Play compliance: fixed iOS and Android crashes, made audio uploads more resilient, and built media capture, export and sharing.

Full-Stack AI Product Engineer
Olivia AI | Remote (Vancouver, Canada) | Jun 2024 – Jul 2025

- Built an AI-powered SaaS application from scratch, including the dashboard, LLM features and backend services.
- Developed a real-time voice AI agent and real-time collaboration for canvas workflows using LiveKit.
- Built queue-based background job processing to run and optimize AI agent workloads.
- Implemented OAuth authentication and file integrations with Google, Dropbox and Microsoft OneDrive, plus real-time notifications.
- Created CI/CD pipelines with GitHub Actions deploying to Fly.io and RunPod serverless GPU infrastructure.
- Deployed edge services on Cloudflare Workers to improve global performance.
- Set up the end-to-end testing framework with Playwright.

Senior Software Engineer (Part-Time Contract)
Powered By Propeller | Remote (United Kingdom) | Nov 2024 – Jun 2025

- Led code reviews for maintainability and scalability across three client platforms: Visible Voice (disability-inclusive fashion and media), Scouty (film and photo location rentals in London) and Togather (events marketplace with thousands of suppliers and venues).
- Worked directly with the project manager and clients to align technical scope with business goals.

Senior Frontend Engineer (Part-Time Contract)
Contact | Remote (United Kingdom) | Oct 2023 – Nov 2024

- Led code reviews and mentored junior engineers building features for the Contact platform.
- Planned sprint scope and deliverables with the project manager.

Senior Software Engineer
Kroma Entertainment | Mandaluyong City, Philippines | Apr 2023 – Jun 2024

- Developed and deployed serverless applications on AWS using SST (Serverless Stack), building scalable, cost-effective and highly available services.
- Built platforms for Nyma Talent Management and Pie Channel, the Philippines' first interactive entertainment channel, where viewers participate and win prizes.
- Maintained code quality with unit and integration tests and code reviews, and mentored junior engineers.

Software Engineer
Moment (via Offshorly) | Remote (Los Angeles, United States) | May 2021 – May 2023

- Built live streaming with Agora for real-time broadcasts and video-on-demand (VOD) recording on the Moment House ticketed live-event platform.
- Built "World", a 3D gamified live streaming experience, using Three.js.
- Developed direct-message and group chat, plus moderation tools for chat and forums.
- Ran stress tests and resolved performance bottlenecks ahead of high-traffic live events.
- Converted Figma designs into production React.js components and built a Retool app to streamline internal operations.

Full-Stack Engineer
Activ Ltd. | Remote (United Kingdom) | Feb 2019 – Dec 2020

- Built Activ v3, a drag-and-drop website builder for clients.

- Delivered brochure and e-commerce websites with custom features, payment gateway and third-party API integrations.
- Built internal tools for employee and franchisee management and a Telegram chatbot.

Full-Stack Engineer (Contract)
SKYCRU | Remote (United States) | Jul 2020 – Oct 2020

- Built a web portal from scratch with React.js, TypeScript, Apollo GraphQL, Node.js, Express.js, Knex.js and MySQL, including role-based access control and MobX state management.

Full-Stack Engineer (Contract)
Fitslanguage | Camarines Norte, Philippines | Nov 2019 – Apr 2021

- Maintained and modernized a legacy web application, improving layout usability, performance and scalability.

Back-End Engineer
24Task | Daet, Camarines Norte, Philippines | Aug 2018 – Feb 2019

- Built backend systems with PHP (CakePHP) and MySQL, frontends with Angular and TypeScript, and mobile apps with Flutter and Dart.

Laboratory Head and IT/CS Instructor
Our Lady of Lourdes College Foundation | Philippines | Jun 2017 – Apr 2018

- Taught web, mobile and Arduino programming to BSIT/BSCS students and helped develop the IT/CS curriculum.

EDUCATION

Bachelor of Science in Information Technology
Our Lady of Lourdes College Foundation | Daet, Camarines Norte, Philippines | 2013 – 2017
